Strong. Simple. Stable.

The PE version is designed to be mounted on the right side of your carrier and pulled out into position for use.

This material is UV-resistant, easily recyclable, durable and robust. Although, PE is prone to marking on the surface, its color stability, robust performance and utilization are in no way affected.

- Durable material and ease of use
- Ideal for carrying various bags and city-rucksacks
- Lateral tilt prevents dirt and spoke collision
- Takes the load off your back and shoulders while riding
- For all frame sizes from 24 to 30 inches
- For bags with a max . handle length of 17cm
